

Taxi Move

Tech Offer ID: CAS_T00008 | Published: 21 August 2014

Helpdesk: Mangena Mhlabunzima | Phone: 060 830 0458 | Email: support@connectandsolve.co.za

Personal Information

Contact Name:	Thulani Mkohli
Organisation/Business Name	JST Solutions
Organisation Type:	SMMEs
Location:	Port Elizabeth, Eastern Cape
Type of Industry:	ICT
Technical Area:	Software Development

Technology Offer Description

Technology Maturity:	Prototype
Proof of Concept:	No
Intellectual Property:	Yes
Desired Relationship	Investor /Funding and Co-development partners only

Summary:

Taxi Move is a simple yet efficient and effective solution for managing logistics and customer service in the taxi industry, consisting of a desktop and android application.

Detailed Description:

Taxi Move was created in 2012 to bridge the gap between the taxi industry (initially for the Nelson Mandela Bay region) and the fast-paced world of technology. Therefore Taxi Move brings both worlds (technology plus the taxi industry) together into one professional software system.

Taxi Move aims to provide control over the daily operations that occur within the taxi industry. With its innovative and unique technology use – the public transport industry will be able to efficiently and effectively maintain order and avoid chaos amongst the various taxi ranks, and ensure smooth operation at the association offices.

The prototype has been completed and there is a need to pilot the solution. Therefore investors such as Taxi Associations and Mobile Network Operators (MNO) are needed to help with funds and to pilot the solution as co-development partners also to provide testing facilities.

Team and Related Experience:

Thulani Mkohli, (Developer), 3 years experience (elaborate on experience), NDip IT (Software Development)

Jacques Labuschagne, (Software Developer), 5 years experience (elaborate on experience), NDip IT (Software Development)

Sheryl Cox, (Software Developer) 3yrs + 1yrs SQL developer experience NDip IT (Software Development)
